NexSource Power and Spirit Global Energy Solutions reach exclusive agreement!

SYLVAN LAKE, ALBERTA – NexSource Power continues to redefine industry standards by offering a multitude of high quality turnkey solutions to our present and future customers. We are thrilled to announce that we now have another exceptional product to add to our strong line of services.

NexSource Power is now the exclusive source for everything that Spirit Global Energy Solutions offers in Central and Southern Alberta, as well as parts of Eastern Saskatchewan.

After reviewing several E & I companies, Dover Artificial Lift knew there was only one choice. “NexSource Power’s reputation and diversity ultimately led to us choosing them”, says Dallas Barrett, Business Development Manager for Spirit Global Energy. “They are a perfect fit for Dover.”

Spirit’s technology, tools and talent are changing the production tempo in the oil field. Spirit uses Dover’s extensive well optimization experiences in artificial lift to innovate new products that meet the needs of producers. Spirit products and service set the artificial lift performance standard for the future.

“The Spirit line is a fantastic addition to our company and compliments a lot of the work we are already doing”, says Darnell Dakin, President and General Manager for NexSource. “We’re excited to show this to our customers.”
